Abortion: There is no such thing as abortion "reversal"

...ians who say otherwise deserve to be marked as "unprofessional"

...shael Belmonte, M.D. 1:30 AM MDT on Mar 16, 2023

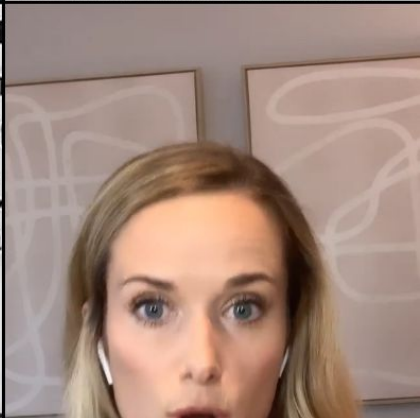

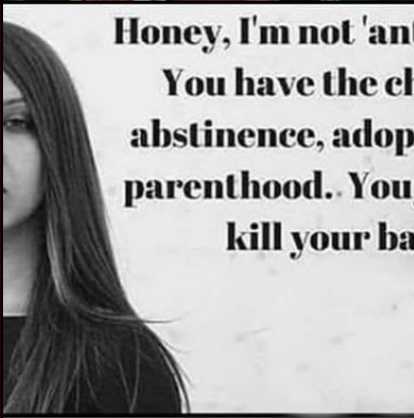

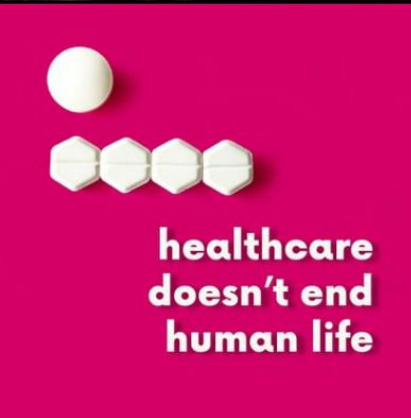

...an OB/GYN and a practicing physician. I cannot state with enough certainty that there is no such thing as abortion "reversal" that is not dangerous to pregnant people, and it should not be a part of any medical practice or public policy.

...mind mid-abortion and did this to save her twins

By Caleb Parke | Fox News

A set of twins in North Carolina was saved after their mother, upon

Planned Parenthood Action @PPact · Aug 8, 2017

Don't EVER let this phrase fool you: "Abortion reversal" is flat-out false & dangerous myth.

Chemical Abortion Reversal

The first abortion pill, mifepristone, counteracts the mother's progesterone to deprive the baby of oxygen and nutrients. However, it does not act immediately. The baby may live for days.

The abortion pill process may be reversed if the mother does not take the second pill and instead is prescribed extra progesterone to counteract the effects of the mifepristone.

There is a 64-68% chance of successful reversal if the mother begins the progesterone within 72 hours of ingesting the mifepristone abortion pill.

Breaking news: Supreme Court Keeps Abortion Pill Available, for now
